Advice on safe handling: Provide sufficient air exchange and/or exhaust in work rooms.
- Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces.
- Minimize dust generation and accumulation.
- Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations.
- Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres.
- Breathing must be protected when large quantities are decanted without local exhaust ventilation.
Keep container closed when not in use.

Conditions for safe storage:
